Flexibility Delivers Real Cost Savings

The imagePRESS has a wealth of inline finishing options that can help you achieve significant cost savings by reducing your need for outsourcing. Accomplish inline saddle-stitching or perfect binding, punching, and laminate with an Inline UV Coating Unit. The imagePRESS offers a wide variety of applications with a large printable area, full size or 12x18 two-page spreads with full bleed, and step-and-repeat positioning to print identical copies in RIP imposition.

GROUND BREAKING FOR WINSTON CHILDREN'S GARDEN

WORK ON THE MUCH-ANTICIPATED WINSTON CHILDREN'S GARDEN (WCG) IS NOW UNDERWAY. COMMUNITY LEADERS AND GARDEN STAFF AND VOLUNTEERS GATHERED AT THE FIVE-ACRE TRACT FOR A FRESH RIBBON-CUTTING CEREMONY ON A WARM DAY IN MID-MAY. RONALD JONES, BOARD PRESIDENT OF THE GRACE JONES FAMILY FOUNDATION, A MAJOR UNDERWRITER OF THE WCG, CUT A CEREMONIAL RIBBON TO SIGNAL THE START OF CONSTRUCTION ON THE PROJECT.

"My mother treasured her relationship with Crescent Fields," Jones said. "I know she would have embraced the WCG project and its mission of providing plant education and interactive entertainment for children."

Garden Director Dr. Josh Smith outlined a grand vision for the WCG, which includes creating three "engagement zones" for children aged 4 to 16.

"The zones will represent the different microclimates in our state," Smith said. "Each zone will be designed to be highly interactive, so children will have the opportunity to learn by being hands-on and engaged."

Crescent Mountain will feature native plants from the state's highlands zone, including rarities like pitcher plants propagated through the garden's conservation department. The zone also will include an interactive display and game that allows children to score points as they learn about the state's unusual mountain environment.

Crescent Midlands will showcase the horticultural diversity of the state's midsection. The zone will include an outdoor classroom with sophisticated multimedia capabilities. The garden's education staff is already developing a series of age-appropriate programs.

Crescent Shore will be the WCG's most ambitious engagement zone. Along with extensive planting, it will include a special "beach house" aquarium building where children can learn about the shore zone's diverse habitats and ecology. A hands-on display will allow children to experience with their full range of senses each habitat's unique qualities.

Project architect Jane Meadows projects three to six months to install the WCG's paths, landscaping, and infrastructure. All work should be completed no later than December with an official opening shortly thereafter.

"We know there is a lot of community interest in the WCG," Meadows said. "To keep the community updated, we're installing webcams throughout the site. Anyone visiting our website can see work progressing in real time."

Movies-By-Moonlight

Crescent Fields outdoor movie series kicks off next month with family-friendly movies in our large grass fields area. It's a great time to have a picnic and create new family memories that will last a lifetime. Make sure to check our website for the schedule and weather updates.

Picture and sound for the series will be superb, thanks to a generous gift by the MRP company. MRP has provided the garden with a new 1080P digital projector, 200-inch screen, and 7.1 sound system.

"We love the garden and its commitment to outdoor cinema," said MRP President Ned Gibson. "It's a privilege to be able to do this."

All showings take place on Saturday on the great lawn and begin promptly at 8 p.m. Admission for garden members is free. Gourmet popcorn, chocolate-covered strawberries, and other treats are available from the Piazza Café until 10 p.m.

Compact and Modular Booklet Making Solution

The SDD Press Trim Module for the imagePRESS V900 Series and varioPRINT 140 series QUARTZ is a dynamic trimming solution that adds a professional finish to saddle stitched booklets. The compact footprint allows small shops to create professional, lay-flat booklets of premium quality. Great for brochures, manuals, reports, and marketing collateral, the SDD Press Trim Module can help operators produce finished booklets with a high-end appearance that are ready for packing and shipping in a short amount of time. Operators can easily manage their production workload and its internal intelligence allows operators to switch easily between varying booklet sizes with minimal intervention. Combining the output quality of Canon's color and monochrome digital presses with the SDD Press Trim Module's small footprint and flexible design can help production environments produce high value work, which can help elevate brands in a diverse range of formats.

Specifications

PTM7600 Set

Included Modules	Press Trim Module PTM7006 Conveyor Belt Stacker CBS6060
Supported Presses	imagePRESS V900 Series varioPRINT 140 series QUARTZ
Infeed	Booklet Finisher-AG1
Input Book Size	8.27" x 11" to 9.6" x 12.6"
Book Thickness	Up to 25 sheets ¹
Paper Weight	16 lb. Bond to 110 lb. Cover
Face Trim Amount	.08" to .98"
Belt Stacker Length	23.6"

PTM7600 SFM Set

Included Modules	Press Trim Module PTM7600 SquareFold Module 7004 Conveyor Belt Stacker CBS6060
Supported Presses	imagePRESS V900 Series varioPRINT 140 series QUARTZ
Infeed	Booklet Finisher-AG1
Input Book Size	8.27" x 11" to 9.6" x 12.6"
Book Thickness	Up to 25 sheets ¹
Paper Weight	16 lb. Bond to 110 lb. Cover
Face Trim Amount	.08" to .98"
Belt Stacker Length	23.6"
